

Fundraise with Easter Lilies & Hydrangea

Spring is right around the corner, with Easter Sunday hot on its heels - April 21, 2019

In preparation, we have been growing beautiful Easter Lilies and Hydrangeas in our greenhouses that will soon be ready to move into their new home - yours! These gorgeous spring plants make great gifts for family and friends, or a beautiful addition of colour for your very own celebrations, and wholesale orders are a great way to fundraise for community groups, sports teams, or schools. You can also purchase wholesale for bulk orders.

Orders must be placed with Salisbury at least one week prior to your delivery or pick up date. Complete payment is due at that time. We accept Visa, Mastercard or cheques. Easter coloured pot covers included. We deliver within Sherwood Park for \$50.00, and within Edmonton for \$70.00.

See below for wholesale pricing and suggested retail prices for fundraising.

Easter Lilies	5-10	11-50	51-100	100+	Suggested Retail
6" Pot: Single Stem 4-7 Blooms	\$12	\$11	\$10	\$9	\$14.99
6" Pot: Double Stem Limited Quantities	\$14	\$13	\$11	\$11	\$16.99
Hydrangeas	5-10	11-24	25-50	50+	Suggested Retail
8" Pot Pink, Blue, or White	\$24	\$22	\$20	\$20	\$28.00

Caring for Your Easter Lily

Choose the Right Plant:

When choosing your Easter lily, don't fall victim to the immediate self-gratification of open flowers. Admire the plant with every flower open and trumpeting out to you, but buy the one with the majority of buds still closed and eager to pop and give you weeks of their shimmering white blooms.

Remove Pollen:

In the Victorian era they removed the yellow anthers because the exposed "organs" gave people impure thoughts. We recommend removing them, but for a different reason; it makes the flowers last longer and you won't have to worry about a yellow nose when you smell them.

Place in a Cool Spot:

The flowers will last longer in a cool spot, so keep it away from bright, sunny windows. Watch out for dry or cold drafts (like a heating vent or oft-opening door), which will shorten its life-span.

Water Soil When Dry to the Touch:

It will only need water when the soil dries to the touch, and shouldn't need to be fertilized unless you're planting them outside in spring. If you bought it in a foil wrapper, make sure to either remove the wrapper, poke holes in it, or be vigilant about draining it lest your lily drown in its own wet feet.

Overwintering:

Depending on who you ask, you'll hear that Easter Lilies are hardy anywhere from zone 5-8. The exact zone doesn't matter much here in zone 3, although I have heard anecdotal tales about people overwintering them in areas that are close to the house and very sheltered.
